Interface Displays & Controls Receives Major Contract for Data Display & Transfer Units

Oceanside, California — September 18, 2002 — Interface Displays & Controls, Inc. (Interface) was awarded a major contract from Smiths Aerospace – Electronic Systems, Grand Rapids Division, for 453 Data Display & Transfer Units (DDTU) that will be initially installed on the USAF KC-135 aircraft. The DDTU will provide the man to machine interface for the Turbine Engine Monitoring System of the Smiths Integrated Data Acquisition Recorder System (IDARS). The DDTU includes a 2-line 16-character LED display, 9 control keys, and a PC card drive for recording and/or downloading maintenance data from the Smiths IDARS. The DDTU is compatible for use with Night Vision Imaging Systems (NVIS), will accept standard PC memory cards, and can be programmed by the customer to communicate with an array of aircraft systems. The DDTU is part of a family of Display & Transfer System (DTS) products that are available from Interface for use on both military and commercial aircraft.

About Interface Displays & Controls, Inc.

Interface has been supplying innovative and reliable products to the military aviation industry for more than twenty-nine years. The company specializes in the design and manufacturing of cockpit controls, display devices, data transfer systems, rugged computing devices, and keyboards for both military and commercial aircraft. All products are available with Night Vision (NVIS) compatible lighting and are useable in applications for aviation, marine, search & rescue, police, surveillance & security, as well as land vehicles and weapon support systems.
