

FOR IMMEDIATE RELEASE

Interface Displays & Controls Receives USAF Design Engineering Support Program (DESP II) Subcontract Awards

Oceanside, California — July 19, 2006 — Interface Displays & Controls, Inc. (Interface), a certified women-owned small business, has been awarded subcontracts on four small-business prime teams to be among a small group of companies allowed to compete for portions of a contract worth up to \$1.9 billion over the next five years. The Design and Engineering Support Program (DESP II) is a five-year, multiple award, and Indefinite Delivery Indefinite Quantity (IDIQ) contract vehicle available for government agencies. The order-writing period is for five years, and the performance period of any task order (TO) must be complete within two years after the expiration date of the basic contract.

The purpose of the contract is to provide rapid, high-quality engineering and technical services to the Air Force Air Logistics Center, Air Force Materiel Command (AFMC), the Army's Tank-Automotive and Armaments Command (TACOM), Department of Defense (DoD) agencies, and other government entities (e.g., NASA, DOT, DOS, EPA, OSHA, etc.).

“This award recognizes Interface’s superb work with government customers,” said Brent R. Barker, Vice President of Sales and Marketing. “Interface is pleased to be selected to support the defense community’s contracting requirements.”

About Interface Displays & Controls, Inc.

Interface has been engineering and manufacturing innovative and reliable products for the military aviation industry for more than twenty-nine years. The company specializes in the design and manufacturing of cockpit controls, display devices, data transfer systems, rugged computing devices, and keyboards for both military and commercial aircraft. All products are available with Night Vision (NVIS) compatible lighting and are useable in applications for aviation, marine, search & rescue, police, surveillance & security, as well as land vehicles and weapon support systems.
