

FOR IMMEDIATE RELEASE

**Interface Displays & Controls Selected by USAF for the
F-16 Data Entry Display (DED) Re-design Program**

Oceanside, California — October 5, 2006 — Interface Displays & Controls, Inc. (Interface), a certified women-owned small business, has been selected by the U.S. Air Force (USAF) to provide a new F-16 Data Entry Display (DED) for the entire F-16 fighter fleet (blocks 15/25/30/32/40/42/50/52).

“This significant award recognizes Interface as a leader in display technology and marks our continued support of Department of Defense (DoD) and international weapons systems,” said Bill Lang, President & CEO of Interface. Interface’s F-16 DED will be a form, fit and function replacement of the current F-16 DED.

“Interface’s new DED display technology will help enhance the performance and reliability of the F-16’s avionics systems”, said Brent Barker, VP Sales & Marketing at Interface. “The selection by the USAF broadens our experience with repair cost avoidance, and reliability and performance improvements to legacy aircraft avionics’ systems.” added Barker.

About Interface Displays & Controls, Inc.

Interface has been engineering and manufacturing innovative and reliable products for the military aviation industry for more than twenty-nine years. The company specializes in the design and manufacturing of cockpit controls, display devices, data transfer systems, rugged computing devices, and keyboards for both military and commercial aircraft. All products are available with Night Vision (NVIS) compatible lighting and are useable in applications for aviation, marine, search & rescue, police, surveillance & security, as well as land vehicles and weapon support systems.
