

FOR IMMEDIATE RELEASE

**Interface Displays & Controls Issued
National Stock Number (NSN) 5895-01-593-8172
For Their Data Entry Display**

Oceanside, California — June 23, 2011 — Interface Displays & Controls, Inc. (Interface), a veteran-owned small business, has been issued NSN 5895-01-593-8172 for their Data Entry Display (DED).

The DED is a message center for avionic communications, providing warning and annunciator functions. The display units are compatible with Night Vision Imaging Systems (NVIS) and accept Manchester II encoded data. Interface's DED is currently used on the US Air Force F-16 aircraft.

"The low power feature of our DED translates into a unit that is cool to the touch while the use of LED technology provides higher reliability at a more competitive price" said Will Tyson, F-16 DED Program Manager.

About National Stock Number (NSN)

A National Stock Number (NSN), as it is known in the US, or a NATO Stock Number, is a 13-digit numeric code identifying all the "standardized material items of supply" as they have been recognized by all NATO countries including the US Department of Defense. An item having an NSN is said to be "stock-listed," which expedites the purchase process.

About Interface Displays & Controls, Inc.

Interface has been supplying innovative and reliable products to the military aviation industry for more than 30 years. The company specializes in the design and manufacturing of cockpit controls, display devices, data transfer systems, rugged computing devices, and keyboards for both military and commercial aircraft, as well as reverse-engineering of legacy and obsolete avionic products. All products are available with NVIS-compatible lighting and are useable in applications for aviation, marine, search & rescue, police, surveillance & security, as well as land vehicles and weapon support systems.
